At little about me...

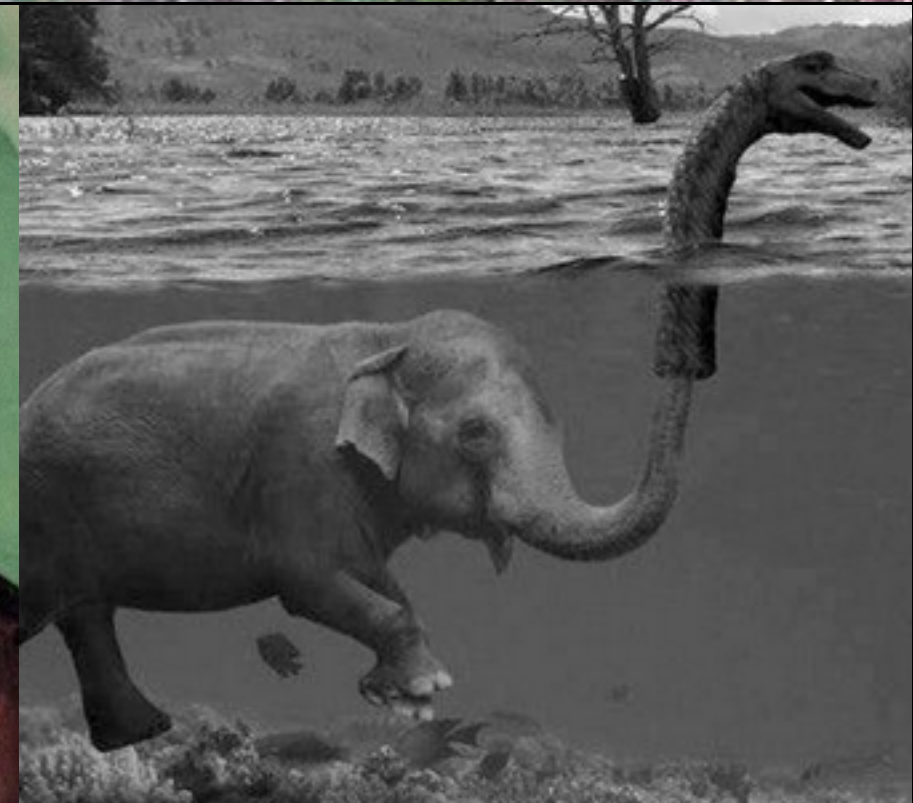

Also...

What this talk is about

- Common misconceptions about the various languages we use
- Ideas certain code communities have about other code communities
- Concepts that differ in the perception of open source and enterprise

What this talk won't be about

Myths about Ruby

Because Rails

Some messed up things people say...

- “Designers aren’t developers...they shouldn’t be at ‘hard core tech’ meet ups”
- “SysAdmins can live without developers...what do we need them for?”
- “Business folks just don’t get developers”
- “Tech people are socially inept...all of them”
