SERVERLESS FUNCTIONS MADE SIMPLE

Vivek Singh - @viveksyngh  
Contributor @OpenFaaS  
Software Engineer @Akamai

OPENFAAS

# Serverless

Architecture is evolving. Serverless is an evolution.

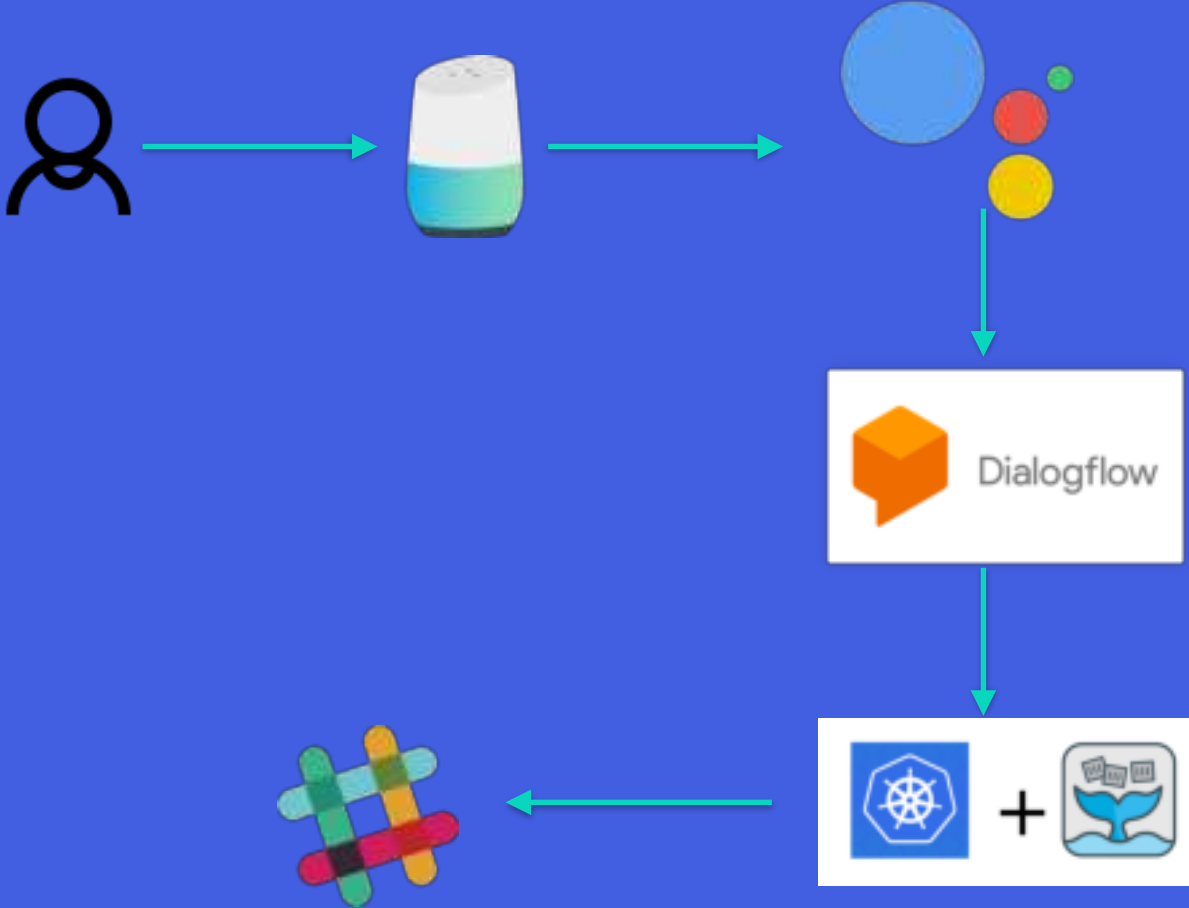

# Serverless function

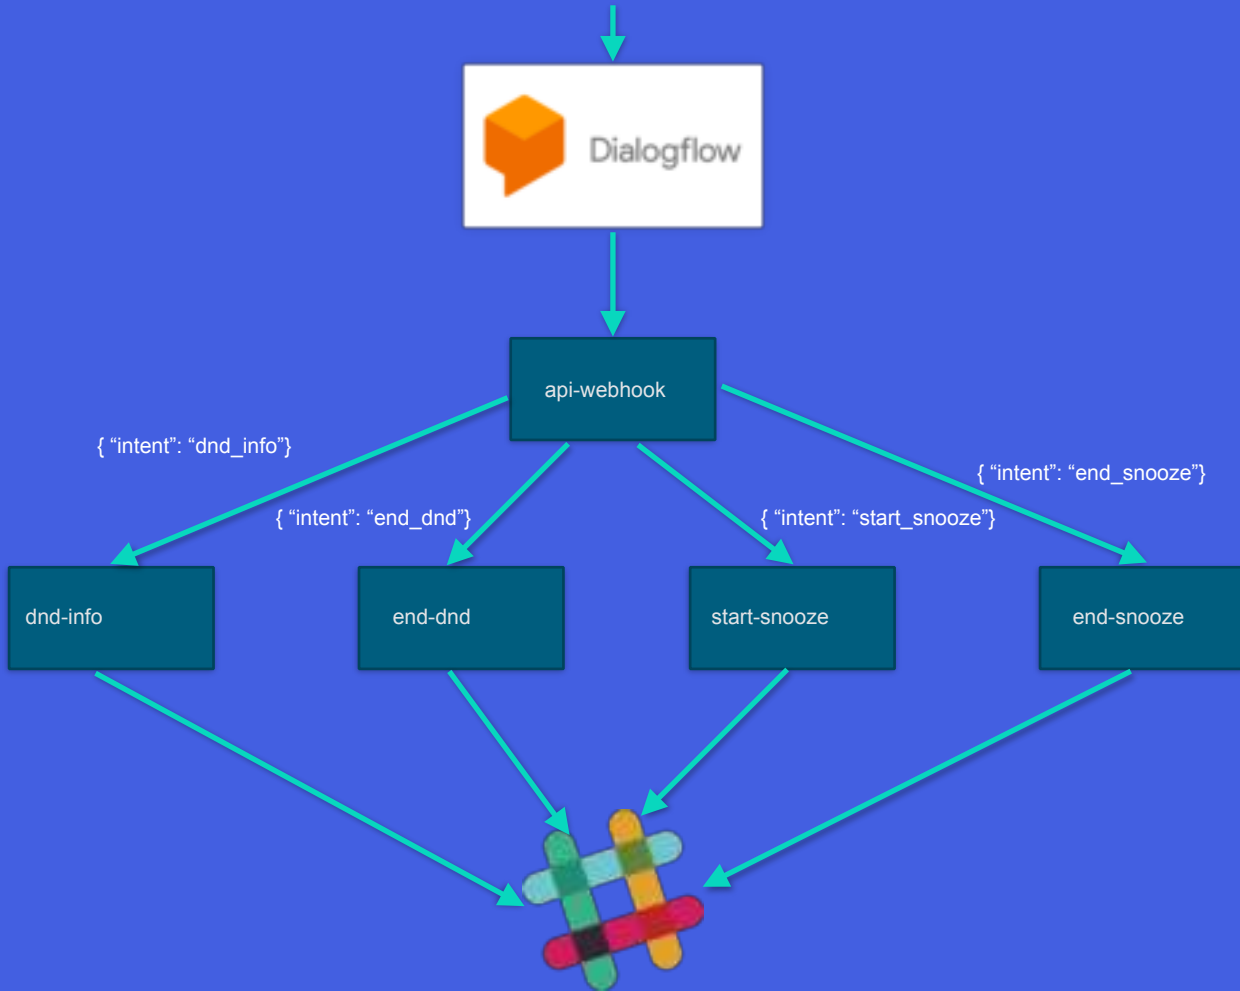

- is short lived
- is not a daemon
- is not stateful
- executes in few seconds

# Demo

# Demo

# OpenFaaS: Driven by Values

★ 12k 

**Open  
Platform**

**Portability**

**Developer  
First**

**Community-  
Centric**

## Developer-First: Serverless on your terms

Ease to use

Any code  
Anywhere  
Any scale

*You* decide the limits

# Functions as a Service

API Gateway

Function Watchdog

Prometheus

Swarm

Kubernetes

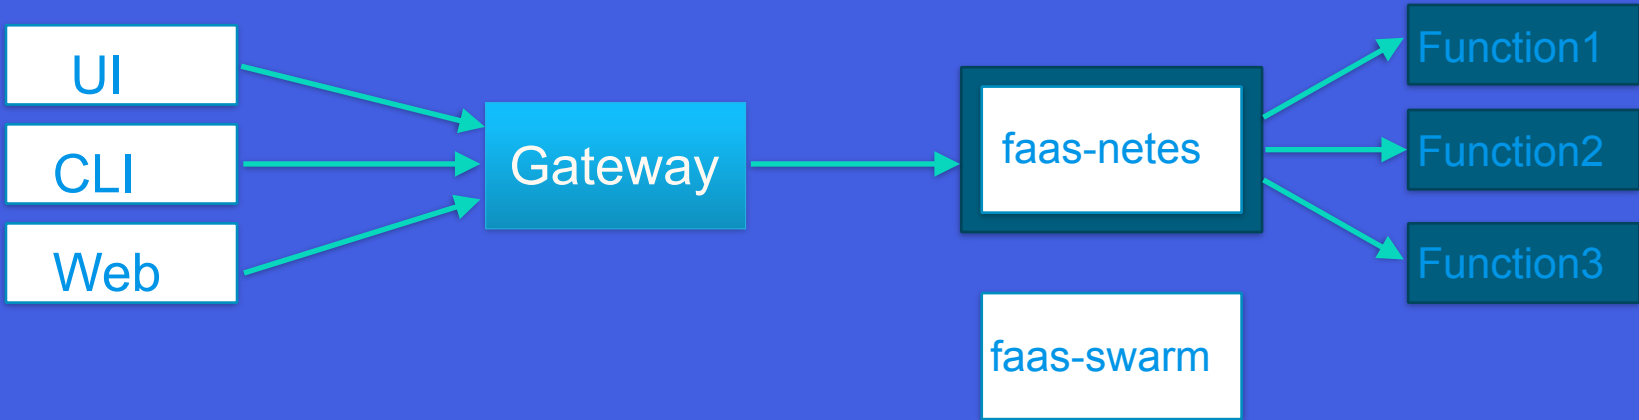

docker

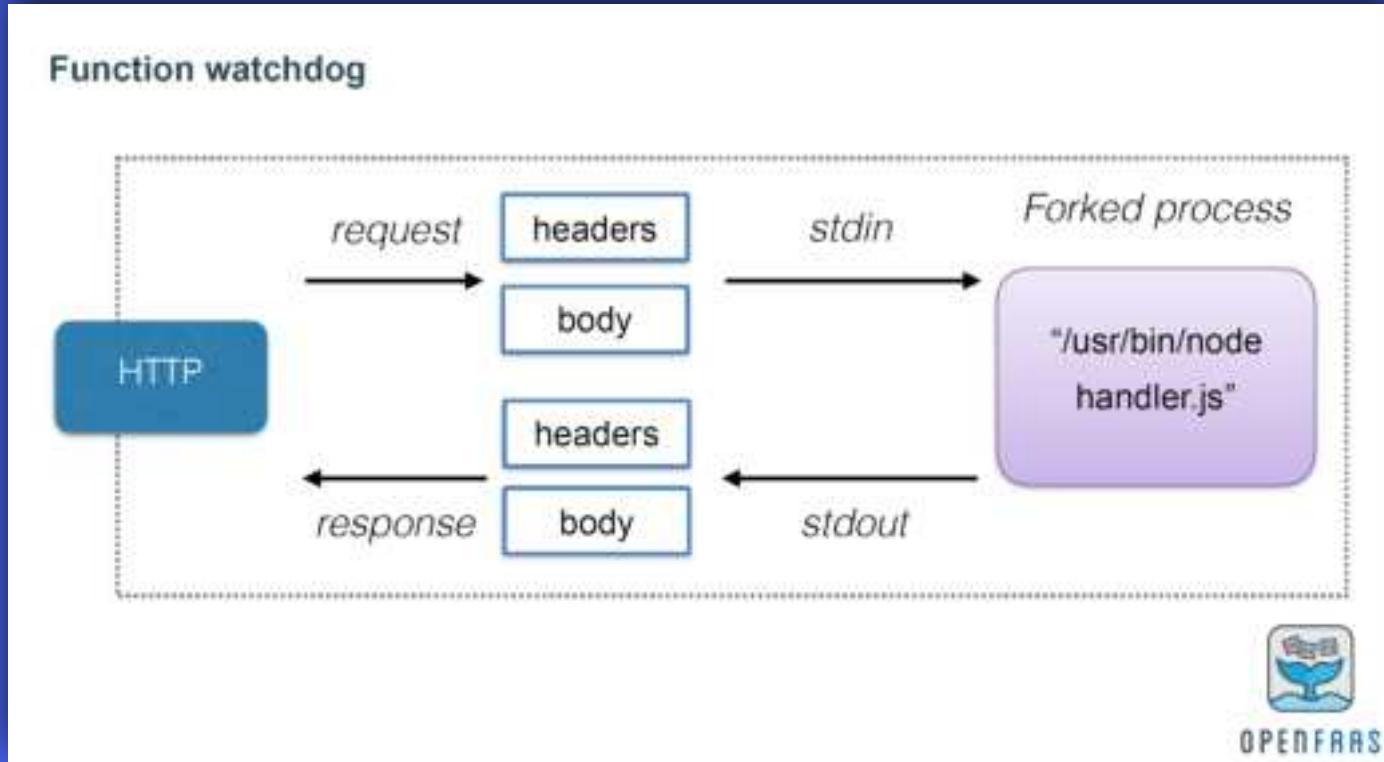

# Components

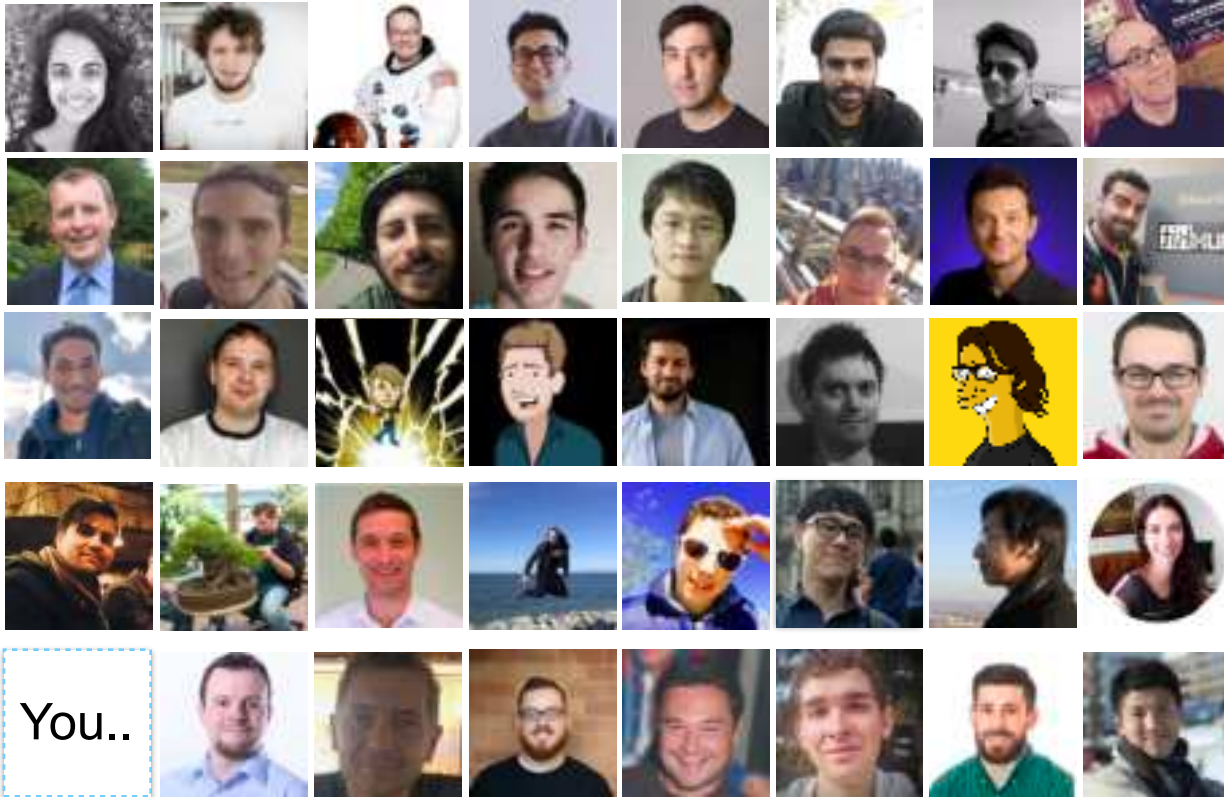

# Function Watchdog

of-watchdog: Next-generation watchdog

# Community-Centric: Built by Community for the Community

## How can you contribute?

Other than fixing issues and adding new functionality, there are multiple ways in which you can contribute to project.

- Share your experience with OpenFaaS (Blog, Tweet etc.)
- Help with Github issues (Triage, Comment, Close etc.)
- Help other users, answer questions (Slack, Github )
- Talk about it (Conference, Local Meetup)
- Take part in #FaaSFriday

Join slack: <https://goo.gl/1wU5Pg>

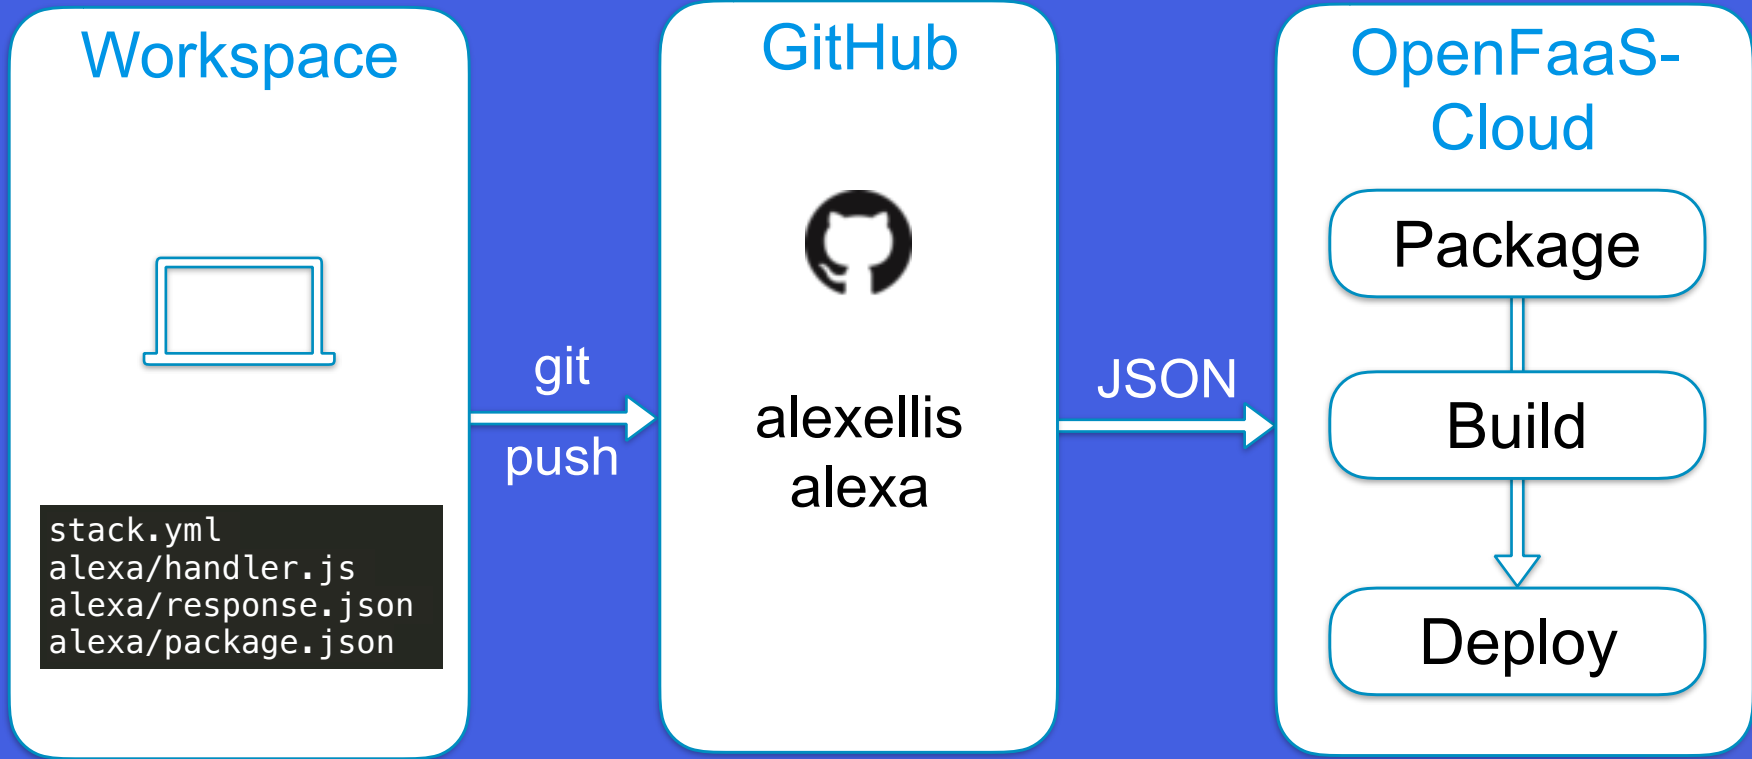

## Roadmap

- Grow #TeamServerless
- Easier integration with event sources
- “OpenFaaS Cloud”

# GitOps + Functions = OpenFaaS Cloud

OPENFAAS

Thank you!
