# When workers are alone, safety needs to stay connected.

Lone and mobile workers can face vulnerable situations without immediate support.

## Working Alone

Employees may be away from colleagues, offices or fixed workplaces.

## Remote & Mobile

Teams can be spread across properties, sites, communities and customer locations.

## Need for Fast Help

When an incident occurs, workers need a simple way to raise an alert and share their location.

**The opportunity: turn the smartphone employees already carry into a practical safety tool.**

# Meet LWS Protect

Simple, scalable lone worker protection without dedicated hardware.

## Use the phone they already have

LWS Protect works on Android and Apple smartphones.

## Deploy quickly

The platform can typically be deployed within 48 hours, depending on onboarding.

## Scale across teams

Designed for organisations from 10–5,000 employees and beyond.

**Self-monitoring or 24/7 professional monitoring — choose the response model that fits your organisation.**

# Key features that keep workers connected

Practical tools for alerts, location awareness, check-ins and incident management.

## SOS Alarm

Raise an alarm whenever immediate assistance is required.

## GPS Location Sharing

Provide responders with accurate location information.

## Welfare Check Timers

Automated check-ins for lone and remote workers.

## Activity Sessions

Monitor workers while undertaking specific tasks.

## Real-Time Dashboard

View alerts, locations and worker status centrally.

## Incident Reporting

Capture and review safety events across the organisation.

## Push Notifications

Communicate directly with app users.

## Flexible Monitoring

Self-monitor or use professional 24/7 monitoring.

# Who can benefit from LWS Protect?

Built for organisations with people working alone, remotely or across multiple locations.

## Retail

Store managers, lone workers and mobile staff.

## Education

Employees working alone across schools, colleges and universities.

## Property Management

Property managers, maintenance and housing teams.

## Charities & Community

Workers engaging with clients in the community.

## Facilities Management

Mobile and dispersed teams.

## Mobile Workers

People working independently away from a fixed workplace.

# Why organisations choose LWS Protect

Designed to remove friction from workforce safety.

## Fast to Deploy

Protect teams in as little as 48 hours.

## No Extra Hardware

Employees use smartphones they already carry.

## Flexible Monitoring

Choose internal response or professional 24/7 monitoring.

## Multi-Site Ready

Support dispersed teams and multiple locations.

## Transparent Pricing

User-based pricing with volume discounts.

## Easy Administration

Central management for users, alerts, reporting and safety activity.

# Trusted safety technology

Platform proof points presented on the LWS Protect page

**1,000+**

organisations using the platform

**1M+**

workers protected

**5.8M+**

alarms monitored annually

**12 sec**

average response time

**99.9%**

system uptime

**A scalable platform for organisations that take lone worker safety seriously.**

# Two ways to manage the response

Choose the model that fits your people, risk profile and internal resources.

## SELF-MONITORED

Alerts can be sent directly to managers, supervisors, security teams or internal responders.

- ✓ Your organisation manages the response
- ✓ Works with existing internal procedures

## 24/7 PROFESSIONALLY MONITORED

Trained monitoring operators assess alerts and initiate escalation procedures when required.

- ✓ Professional response support
- ✓ Available as an optional service

# Simple pricing that scales

Monthly pricing per user; volume discounts and custom enterprise pricing are available.

## SELF-MONITORED

1–24 users: \$9.95 / month  
25–99 users: \$9.45 / month  
100–249 users: \$9.05 / month

Your organisation manages the response.

## 24/7 MONITORED

1–24 users: \$12.95 / month  
25–99 users: \$12.05 / month  
100+ users: \$11.15 / month

Professional monitoring manages the response.

# Protect the people who work alone.

Simple app-based protection. Fast deployment. Flexible monitoring.
