## The Bug 🐛

When navigating through the Hoodie website with assistive technology (AT), the logo image has no contextual information, meaning that nothing will be read out that is useful in letting us know what the image does (it links to the home page).

Using OSX Voiceover and tabbing to the image, you will hear `link slash banner 1 item`.

## Steps to fix 🛠️

- Claim this issue (comment below, or assign yourself if you are part of the Hoodie Org)
- Fork and clone the repository
- Add alt text to the logo, something like `Logo link to Homepage`
  - In the main `header.html`
  - In the `header-intro.html`
  - In the `header-initiatives.html`
  - In the `header-get-help.html`
- Commit your changes as one commit entitled `fix(a11y): add alt text to header logo`
- Submit a Pull Request
- Have your PR reviewed & merged

Ping me in the [Hoodie Chat](#) or on [Twitter](#) if you have any questions ✨
