What does it mean "Development meets Infrastructure"?

Software development tries to make solutions

Typical software development

- **Problem**
- Design
- Writing Code
- Compiling & Tests
- Release

Code Style is important

Puppet Parser

- Puppet included
- Syntax validation
- puppet parser validate init.pp

rodjek / puppet-lint

Check that your Puppet manifest conform to the style guide

693 commits | 11 branches | 29 release

branch: master | puppet-lint / +

Bump to 1.1.0

rodjek authored 44 minutes ago

bin	Pass exit value to the shell
lib	Bump to 1.1.0
spec	Add specs for multiple controls in a comment
.gitignore	Ignore swp files
.travis.yml	Force rubygems 2.1.11 on travis

drwahl / puppet-git-hooks

Git client and server side hooks for puppet development

51 commits **1** branch **0** releases **6**

branch: **master** puppet-git-hooks / +

Merge pull request #9 from steeef/master ...

drwahl authored on Jul 31 latest co

commit_hooks	mac-friendly escape characters
README.md	Adjusted from pre-recieve to pre-receive
post-update	initial checkin of files currently in use
pre-commit	remove debugging
pre-receive	mac-friendly escape characters
update	initial checkin of files currently in use

README.md

garethr / puppet-module-skeleton

A pretty opinionated skeleton for writing your own puppet modules

68 commits | 1 branch | 0 releases

branch: master ▾ puppet-module-skeleton / +

Merge pull request #26 from craigwatson/master ···

garethr authored 3 hours ago

skeleton	Travis won't respect the matrix unless you pass the full env
LICENSE	added license details
README.md	README typo and style changes
install.sh	put the install command in a shell script

Unit Tests

rodjek / rspec-puppet

RSpec tests for your Puppet manifests http://rspec-puppet.com

303 commits | 8 branches | 16 releases

branch: master ▾ rspec-puppet / +

Merge branch 'doc75-fix_nil_array' ...

jeffmccune authored on May 2

bin	Add helper script to configure a module for rspec-puppet tes
lib	Add behavior tests for parameter matchers
spec	Add behavior tests for parameter matchers
.gitignore	Ignore .ruby-version
.travis.yml	update puppet version and ruby version to test with travis

Example

```
require 'spec_helper'

describe 'logrotate::rule' do
  let(:title) { 'nginx' }

  it { should contain_class('logrotate::rule') }

  it do
    should contain_file('/etc/logrotate.d/nginx').with({
      'ensure' => 'present',
      'owner'  => 'root',
      'group'  => 'root',
      'mode'   => '0444',
    })
  end
end
```

Acceptance Tests

Vagrant

puppet-vagrant-boxes.puppetlabs.com

Puppet Labs Vagrant Boxes

Pre-rolled vagrant boxes, ready for use ... made by the folks at Puppet Labs

Overview
Current Boxes
Deprecated Boxes

Current Boxes

Latest boxes, built with VirtualBox and/or VMWare Fusion Guest extensions, als

OS	Version	Arch	Guest
Fedora	18	x64	Virtua
Fedora	18	x64	Fusion
CentOS	6.4	x64	Virtua
CentOS	6.5	x64	Virtua
CentOS	6.5	i386	Virtua
CentOS	6.4	x64	Fusion

RSpec tests for your servers configured by Puppet, Chef or anything else.

puppetlabs / beaker

Puppet acceptance testing harness

2,922 commits | 13 branches | 60 releases | 64 con

branch: master ▾ beaker / +

Merge pull request #467 from anodelman/master ...

branan authored 4 days ago latest commit

bin	(QENG-310) move various host configuration steps together
lib	(GEM) version bump for 1.19.1 gem
spec	(QENG-1212) Improve module installation experience
.gitignore	(maint) Add new patterns to gitignore
.rspec	bump to rspec 2.11
.simplecov	PDB-554 Implement a new EC2 backend and add jenkins_build_url to tags
.travis.yml	(MAINT) travis failing on ruby 1.8
CONTRIBUTING.md	(QENG-941) create contributor documentation for beaker

Test Automation

Jenkins

vStone / jenkins-puppet-scripts

Some scripts to do various checks, mainly for jenkins use.

108 commits | **1** branch | **0** releases | **5**

branch: **master** ▾ **jenkins-puppet-scripts** / +

NOOOOO hardcoded paths!

vStone authored on Apr 14 — latest com

check_git_release	Updated help
check_puppet_style	NOOOOO hardcoded paths!
check_puppet_syntax	check_syntax/check_style: initialize $GIT_PREVIOUS_COMMIT if not present
check_yaml_syntax	Only check for existance of hash if there are no parse errors
common	Added method to get the best branch match
package_puppet_tree_fpm	New fpm excludes work in a different way
README.md	Update README.md

Travis CI

Gitlab CI

Continuous Integration
GitLab CI runs tests for your GitLab projects
