

Ceryx

Dynamic Proxy, based on NGINX
<https://github.com/sourcelair/ceryx>

Antonis Kalipetis

@akalipetis

CTO @ SourceLair

Docker Captain and big fan

Python enthusiast

Coffee lover

OSS projects

Xterm.js - Terminal in your browser

Ceryx - Dynamic proxy based on
NGINX

Other smaller ones

Goals

- Instant update of routes
- API
- Good, fast proxying
 - Including WebSockets
 - Easy configuration

What is Ceryx

- NGINX
 - OpenResty
 - LUA
- Redis
- Python Flask API
- MIT

Next steps

- Dynamic SSL support with Let's encrypt
- Docker Swarm endpoint
- Better clustering

Thanks!
